Figure 4a

Fig. 1 is a cross-sectional view of a mechanical assembly. A central vertical shaft (152) passes through a horizontal housing (102). The shaft has a flange (32) at the top and a coupling (36) where it meets the housing. The housing has two internal chambers (103 and 104) separated by a central partition (106). Each chamber contains a component (103 and 104) mounted on a base (107). The housing is supported by a base (130) with legs (132) and is secured by a plate (F) at the top. Various other components are labeled with numbers 179, 181, 198, 45, and 134.
